with No Strings Attached**

From Workshops to Workouts

Whether it's an office, music room, art studio, personal pub or a home gym, garden rooms are the perfect way to add that extra living space to your property.

Integral blinds are a sleek and practical addition to the design. They can be installed in windows, side screens, and any type of standard door including bi-fold and sliding doors. They look stylish and sophisticated, giving your garden room it's finishing touches.

They are also incredibly practical. The Tilt feature of the units allows you to direct the sunlight, removing glare without compromising the brightness of the room. And if the temperatures soar, integral blinds will reflect the sun's rays and keep the sun from overheating the space.

Another big selling point for garden rooms is privacy. To help with distraction, being able to screen off some or all of the view can be a lifesaver. It allows for complete focus, especially if others are also enjoying the garden.

If you are looking for additional living space, now is the time to venture outside and start planning your ideal garden room, complete with integral blinds.

Manual Magnetic Blinds

Stylish and Sophisticated

Our integral blinds offer a versatile and contemporary means of privacy and shading to any garden room. Melding functionality with a chic look and feel, they are a smart alternative to traditional window treatments. They reduce glare and sunlight, and regulate the temperature of a room.

The totally cordless and child-safe system is operated via sliding magnetic blocks. These simple-to-use and unobtrusive controls are located around the edge of the unit.

The units contain a unique tracking system for the magnet meaning that it cannot get lost or be removed from the rails. The double-glazed panels are hermetically sealed, with the blinds inside protected from moisture, dust and damage. Unlike external curtains or blinds, they need no maintenance and are free from spills and odours.

The full lifting of the blind happens in one slick and easy motion while the tilt function allows you to set the levels of vision and light.

- Available in sizes up to 2500mm high and 2000mm wide. (Please note, width and height restrictions can apply).
- Full range of glazing options including fire rated and noise reduction.
- Available in 8 colours (see back page).

Motorised- Battery Powered

Elegant and Effortless

We also offer battery powered units, perfect for a self-contained garden room. This option is incredibly user-friendly and allow instantaneous shading or privacy at the push of a button.

Battery powered blinds are controlled via a rechargeable battery pack. This can be attached magnetically to either the glass surface or the frame. The blinds can be operated via buttons on the battery pack, or from the comfort of a sofa, bed, or desk with a remote control. With our sleek design, installation is quick and easy, with no electrician needed, and no need to tap into mains power.

For the ultimate in usability, the motorised blinds can be controlled individually or in groups of up to 12. They can also be assigned to automatically open or close at set times.

As with all our products, the motorised units are also fully sealed and double-glazed, safe from smells, dust and germs. They can be used in exterior windows, doors and side screens, and are available in either Venetian or pleated blinds.

- Blind options - Venetian, pleated, Duette Filtering or Duette Darkening blinds.
- Available in sizes up to 2800mm high and 2500mm wide.
(Please note, width and height restrictions can apply).
- Full range of glazing options including fire rated and noise reduction.
- Available in 10 colours (see back page).

Introducing the BGB Blackout –

an integral magnetic blind designed to block out 98% of light, perfect for dark rooms, bedrooms and other areas where near blackout may be needed.

A specially designed honeycomb curtain with a bespoke internal foil lining to limit the amount light passes that through is now available hermetically sealed within a standard 28mm thick double glazed unit.

Like our BGB Venetian blind the blackout version is controlled via our uniquely robust and smooth-to-operate magnet to ensure easy operation even on the larger size blinds.

Blackout Blinds

- Maintenance Free - hermetically sealed double-glazed panels protected from moisture, dust and damage.
- Available in sizes up to 2999mm high and 1500mm wide.
(Please note, width and height restrictions can apply).
- Full range of glazing options including solar shading, low E, fire rated and noise reduction.
- Standard units are 28mm thick when glazed, with 4mm glass either side of the 20mm spacer bar.
- Available in 3 colours: White (RAL 9016), Silver (RAL 7042 and Champagne (RAL7032) – and the frame/magnet is available in all standard BGB magnetic colours.

No Strings Attached

Stylish and safe design with no external cords.

Completely Maintenance Free - protected from damage and dust.

Comes with a full 10 year warranty on the double glazed unit, 5 year warranty on the magnetic operation and 2 year warranty on the motorised blind.

Ideal for sliding and bifold doors.

Manufactured in accordance with all parts BSEN 1279 and have full CE accreditation.

Magnetic Blind Colours

Motorised Blind Colours

Venetian blind colours are representational only and these can be affected by your chosen glazing options.

Note: Colours and RAL numbers are representational only, please contact us for further information and to request a colour swatch.
